

# METHYL ACETYLENE, PROPADIENE MIXTURE

(STABILIZED)

UN 1060

Shipping Name: Methyl acetylene, propadiene mixture, stabilized

Other Names: Allene-methyl acetylene mixture

MAPP gas

Methyl acetylene-allene mixture

## WARNING! • EXTREMELY FLAMMABLE!

### Hazards:

- Container may BLEVE or explode when exposed to fire
- Gas is heavier than air and will collect and stay in low areas
- Gas may travel long distances to ignition sources and flashback
- Gas in confined areas (e.g., tanks, sewers, buildings) may explode when exposed to fire
- Moderately irritating to skin, eyes, nose and lungs
- Contact with liquid may cause frostbite

### Awareness and Operational Level Training

#### Response:

- Stay upwind and uphill
- Determine the extent of the problem
- Isolate the area of release or fire and deny entry
- Remove all ignition sources
- Evacuate the immediate area and downwind for a large release
- Notify local health and fire officials and pollution control agencies

### Description:

- Colorless liquefied compressed gas
- Garlic-like odor
- Liquid floats on water and boils
- Extremely flammable
- Gas is heavier than air and will collect and stay in low areas

### Operational Level Training Response:

#### RELEASE, NO FIRE:

- Stop the release if it can be done safely from a distance
- Use large amounts of water to disperse gas - contain runoff
- Ventilate confined area if it can be done without placing personnel at risk

#### FIRE:

- Do not extinguish the fire unless the flow of the gas can be stopped and any remaining gas is out of the line. Specially trained personnel may use fog lines to cool exposures and let the fire burn itself out
- Cool exposed containers with large quantities of water from unattended equipment or remove intact containers if it can be done safely
- If cylinders are exposed to excessive heat from fire or flame contact, withdraw immediately to a secure location

### First Aid:

- Provide Basic Life Support/CPR as needed
- Decontaminate the victim as follows:
  - ◆ Inhalation - remove the victim to fresh air and give oxygen if available
  - ◆ Skin - remove and isolate contaminated clothing (including shoes) and wash skin with soap and large volumes of water for 15 minutes
  - ◆ Eye - rinse eyes with large volumes of water or saline for 15 minutes
- Seek medical attention
- Frostbite - warm injured area in very warm water
- For skin burns decontaminate with water and apply a clean dry dressing

CAS: none
